What is the primary benefit of using an SPFILE to maintain the parameter file?

- ☐ Because the SPFILE is binary, the DBA will be less likely to edit it.
- ☐ Changes to the database configuration can be made persistent across shutdown and startup
- ☐ The SPFILE can be mirrored across several drives, unlike PFILES
- ☐ the ALTER SYSTEM command cannot modify the contents of an SPFILE

☐ Clear

Score 0 out of 1

Answer(s) Changes to the database configuration can be made persistent across shutdown and startup
